Art Unit: 1746

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 17, 18, 19, 22 and 31 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Japan 1-259536 (Japan'536).

3. Note that Japan'536 discloses a wafer preparation module comprising a module (15, 13) containing wafer-engaging rollers (2, 3), the rollers being oriented at ***an angle*** (90°), the wafer engaging rollers designed to spin the wafer at ***an angle*** (90°) during preparation.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 21 is rejected under 35 U.S.C. 103(a) as being unpatentable over Japan'536 on view of Japan 11-238713 (JP'713).

Claim 21 defines over Japan'536 only in the recitation of megasonic assembly.

Japan'713 is cited disclosing in a wafer preparation module, the arrangement of providing a megasonic assembly. It therefore would have been obvious to one having ordinary skill in the art to modify the ultrasonic assembly of Japan'536, to be of the

Art Unit: 1746

megasonic type as taught by Japan'723, for the purpose of enhancing the preparation of the wafer.

6. Claim 20 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claims 23-30 are allowed.

8. Applicant's arguments with respect to claims 17-31 have been considered but are moot in view of the new ground(s) of rejection.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In Japan'658 and Japan'110, not the preparation modules.
